

JULY 2022

# CONSTRUCTION BULLETIN

## UW Medicine Behavioral Health Teaching Facility

1550 N 115th St. Seattle, WA 98133

The purpose of this bulletin is to inform staff, patients, visitors and the neighbors close to the University of Washington Medical Center Northwest campus about the Behavioral Health Teaching Facility (BHTF) construction project. This bulletin will be published quarterly during the design phase and monthly during the construction phase. Please see the webpage for more information about the project, construction logistics and the milestone schedule. <https://facilities.uw.edu/projects/behavioral-health-teaching-facility>

### CONSTRUCTION ACTIVITIES

Erection of primary structural steel is complete, including the walkways connecting to the existing A-wing. Concrete deliveries resumed and will continue through the third week of July. Once concrete is poured on a floor level, fireproofing is applied. Concrete and fireproofing work require delivery trucks and heavy equipment to enter and leave the jobsite, resulting in noise and intermittent closures of the campus loop road. Framing begins the third week of July, requiring the use of chop saws, which are very loud for short stints of time. If needed, crews may work on Saturdays between 9am and 6pm in accordance with the approved Construction Management Plan. We appreciate your patience with potential noise disturbance.

The photo below was taken on June 14th celebrating the completion of the primary structure (topping out).

If you have any questions about the upcoming work at UWMC Northwest, please feel free to contact us and we would be glad to provide any additional information.

### PROJECT OVERVIEW

The new Behavioral Health Teaching Facility will be a one-of-a-kind fully integrated welcoming and healing environment for individuals struggling with serious physical and behavioral health problems. The building will support a full continuum of clinical services ranging from effective medication management and psychotherapies to state-of-the-art neuromodulation treatments, medical and surgical care for individuals with medical and behavioral health disorders. The building will also become the home for an interdisciplinary training and workforce development program that is focused on preparing and supporting the next generation of behavioral health providers for Washington State.
