### SUMMARY OF UPCOMING ACTIVITIES (February 15 - March 31, 2024)

In mid February, the team celebrated the final piece of steel being erected. While the crane is now offsite, the structural steel work continues with welding, bolting, and metal decking activities. While steel is finishing up, you will start to see the building enclosure start, with the first activity being metal framing that starts at the end of February. Once the framing is in place, the exterior metal and polycarbonate panels will get installed and you will be able to see the training facility take shape for the UW Men's and Women's Basketball teams.
