

Construction Bulletin T-Wing Renovation

Warren G. Magnuson Health Sciences Center
Ø1959 NE Pacific St, Seattle, WA 98195

Level 6 Skills Lab

The renovation of Magnuson's T-Wing is critical to supporting efficient reuse of the existing Magnuson Health Sciences Center and improving space utilization. The vision for health science education at the University of Washington is dependent upon creating effective spaces that encourages formal and informal interaction among students, faculty, and staff from all six health science schools.

This project will invest in the critical renovation scopes that advance inter-professional instruction and educational technologies essential to meeting current and future accreditation for each of the six health sciences schools.

December Look Ahead

The T-Wing renovation is on track for completion by December 2025.

The Level 5 Classrooms and Level 2 Health Sciences Library are expected to be handed over to UW in mid-to-late December. Renovations to the Level 5 Classrooms include sound-resistant walls, updated audio visual, new paint, improved lighting, and other enhancements.

Construction will continue on the Level 6 Simulation Suite, Level 4 Lobby, and Restrooms, while abatement efforts remain ongoing in the Level 3 Library Testing Center. By the end of December, the Level 6 Lecture Halls will be secured for work.

Throughout the project, the elevators and stair towers will remain fully operational.

Skanska appreciates your patience as we work to minimize noise disturbances and detours.
