

Construction Bulletin T-Wing Renovation

Warren G. Magnuson Health Sciences Center
Ø1959 NE Pacific St, Seattle, WA 98195

Level 4 Restroom

The renovation of Magnuson's T-Wing is critical to supporting efficient reuse of the existing Magnuson Health Sciences Center and improving space utilization. The vision for health science education at the University of Washington is dependent upon creating effective spaces that encourages formal and informal interaction among students, faculty, and staff from all six health science schools.

This project will invest in the critical renovation scopes that advance inter-professional instruction and educational technologies essential to meeting current and future accreditation for each of the six health sciences schools.

Level 6 Skills Lab

October Look Ahead

The renovation of T-Wing is on track for completion by December 2025.

The Level 4 Corridor C was turned over to UW on 9/25 and has reopened to the public.

As foot traffic increases, we have implemented ways to maintain safety around construction areas. To maintain a safe workspace, keypads have been installed on every door accessing a construction zone. Updated signage will be posted to continue to support students in navigating blockages.

Construction will continue on the Level 6 Simulation Suite, Level 3 Library Testing Center, Level 4 Lobby, Level 4 Restrooms, and Level 5 Classrooms. Elevators and stair towers will remain unaffected by construction.

Skanska appreciates your patience with potential noise disturbances and detours.
