

**PUBLIC NOTICE
UNIVERSITY OF WASHINGTON**

Pursuant to the provisions of WAC 197-11-455, 197-11-510 and WAC 478-324-140, the University of Washington hereby provides public notice of the:

AVAILABILITY OF A FINAL ENVIRONMENTAL IMPACT STATEMENT (EIS)

Project Name: Husky Stadium Transportation Management Plan
Proponent: University of Washington – Seattle Campus

Description of Proposal: The University is updating the Husky Stadium Transportation Management Plan (TMP). The University's goal is to prepare a TMP that accommodates a maximum crowd of 70,000 people; modifies mode goals and operational logistics for hosting smaller events than football games (e.g. UW Commencement, other athletic events, etc.); maximizing alternative modes of transportation to reach stadium events; allows flexibility to incorporate future development in transit options (i.e. opening of new light rail stations); and recognizes and accounts for special challenges presented by weekday football games. Two alternatives were analyzed in the Environmental Impact Statement – Proposed TMP Alternative 1 (the Action) and the No Action alternative.

Location of Proposal: Seattle Campus, Husky Stadium is located in the East Campus adjacent to Montlake Boulevard and the University of Washington Link Light Rail station.

Lead Agency: University of Washington

EIS Availability: The Final EIS covers all elements of the environment relevant to the project and can be found online at: <https://cpd.uw.edu/programs/sepa>. A copy will be available in Suzzallo library.
