June 22, 2017

PROJECT: Population Health Facility

PROJECT NUMBER: 205430

PROJECT MANAGERS: Jeannie Natta

ACTION: Project Update: The team will share their progress on the massing and concept design for the building and surrounding landscape.

OBJECTIVE: The facility will serve as a powerful catalyst for the University's new Population Health Initiative and be an idea laboratory and collaboration incubator.

PROJECT DESCRIPTION:

The Population Health Facility will house the Institute for Health Metrics and Evaluation, the Department of Global Health, and elements of the School of Public Health, all of which will greatly benefit from close proximity. The facility will also provide central gathering spaces for faculty, students, staff, partners, and visitors from a wide range of disciplines across campus, the region, the nation, and the world to address important global health concerns.

Project Budget \$230,000,000

Schedule

EIS	September 2016 – April 2017
Site Selection	September 2016 – April 2017
Design	February 2017 – June 2018
Construction	February 2018 – March 2020
Closeout	March 2020 – October 2020

Project Delivery Method Integrated Design-Build
